

KARGRO

Worldwide in casings

KARGRO

Kargro occupies itself with buying and selling, storing and transport of truck casings.

Every day eighteen qualified inspectors are busy inspecting casings closely on site at customers, tyre services and transport companies. If the casings are suitable for retreading, they will be purchased. If they are rejected, they will be carried off to Rimal against a fee, allowing them to be re-used as raw material. Kargro transports the casings by its own means to its storage site measuring 75,000 m². Here they are sorted on size, brand and quality. An average stock of approximately 120,000 casings will be ready for transport or shipment to more than 40 countries throughout the world.

The fact that Kargro is not only a VACO approved, but also a Recy tyre, TÜV and ISO 9002 certified company should guarantee that the casings are well taken care off.
