

Banden Plan Europa BV

Banden Plan Europa BV / Tyre Plan Europe BVBA

UBO

The activities of two companies within the Kargro Group, Banden Plan Europa in The Netherlands and Tyre Plan Europe in Belgium include the retreading of truck-casings. Subject to the customer's wishes, the casings will be retreaded either 'hot' or 'cold'. If retreaded hot they will receive the UBO trademark, while if retreaded cold they will be called Bandag. In any case, the two cold retreading companies do not only operate under the Bandag quality certificate, but are as well as the UBO factory one of the first companies in Europe to be ECE109R and ISO 9002 certified. It goes without saying that the most advanced inspection methods are applied during production. In other words: Banden Plan/Tyre Plan will make you take to the road safely.
